

# Graphical display of SPARQL queries with arq, rapper and graphviz

*mja@statgroup.dk*

*2016-04-26*

## Contents

<b>Graphical display of results from SPARQL scripts for the demographics cube (DC-DEMO-sample.ttl)</b>	<b>1</b>
Get one observation and display graphically . . . . .	1

## Graphical display of results from SPARQL scripts for the demographics cube (DC-DEMO-sample.ttl)

The examples below uses `arq` from Apache Jena (<http://jena.apache.org>). To install arq - download and unpack the latest version of apache-jena from (<http://jena.apache.org/download/index.cgi>). Put the executable `arq` in the path, or invoke `arq` with the full path to the directory with `arq`.

The use of `arq` is described many places, see for example (<http://www.learningsparql.com/>).

All `arq` commands below are to be run in the directory with the sample files, which is `inst/extdata/sample-rdf` directory or `extdata/sample-rdf` depending on the whether the development version or the installed version of the package is used.

The `cd` below in each code block is included because I could not find a quick way to get the code chunk executed in that directory. knitr is flexible enough to do it, I have not yet found the right way to do it. So, ignore the repeated `cd ..`

### Get one observation and display graphically

The SPARQL query returns all triples for one observation, and stores it in the file `fordot.ttl`. The file is used as input to `rapper` and converted to the dot format, and displayed using the dot program part of Graphviz (<http://www.graphviz.org/>).

```
cd ../extdata/sample-rdf
arq --data DC-DEMO-sample.ttl --query OneQBobobservation.rq > fordot.ttl
cat fordot.ttl
rapper -i turtle -o dot fordot.ttl > fordot.dot
dot -x -Tpdf -ograph.pdf fordot.dot
```

```

## rapper: Parsing URI file:///home/ma/projects/rrdfqbcrnd0/rrdfqbcrndex/inst/extdata/sample-rdf/fordot

```

```
## rapper: Serializing with serializer dot
## rapper: Error - URI file:///home/ma/projects/rrdfqbcrnd0/rrdfqbcrndex/inst/extdata/sample-rdf/fordot
## rapper: Error - - The namespace prefix in ":01:28" was not declared.
## rapper: Error - URI file:///home/ma/projects/rrdfqbcrnd0/rrdfqbcrndex/inst/extdata/sample-rdf/fordot
## rapper: Failed to parse file fordot.ttl turtle content
## rapper: Parsing returned 0 triples
```

The pdf file can then be viewed using a pdf viewer.

Alternatively, knitr supports presenting dot as show below.

```
