Results as
RDF Data
Cube

PhuseSubTeamAnalysisResults@example.org

Example:
Demographics
table

Analysis results stored using RDF Data Cube

PhuseSubTeamAnalysisResults@example.org[1]

June 15, 2015

Background

- Motivation
  - Store analysis results in RDF
  - Leverage CDISC in RDF
- Choices
  - use R with RRDF package (interface to Jena)
  - use RDF Data Cube
  - create codelists using SDTM/ADAM

Demographics table

Results as
RDF Data
Cube

PhuseSubTeamAnalysisResults@example.org

Example:
Demographics
table

left - Ians slide from XX   No text   right - same data shown using Kable   âĂŇ
